

Post Graduate Department of Zoology
University OF Kashmir, Srinagar
Hazratbal, Srinagar-190006, Kashmir, J& K

Notice

The Department of Zoology in collaboration with the Division of Fish Genetics and Biotechnology (Faculty of Fisheries, SKUAST-K) Rangil is going to a One day workshop on the assembly & usage of foldscope on **Monday, 28th of January 2019**.

Foldscope is an ultra-affordable, paper microscope that can be assembled easily. Designed to be extremely portable, durable, and to give optical quality similar to conventional research microscopes (magnification of 140X and 2 micron resolution), Foldscope brings hands-on microscopy to new places. The workshop will focus on microscopy popularization and its advantage in field diagnosis in hilly & inaccessible areas. The advantage of this microscope is its compatibility with smart phones and pictures can be saved in phones. The microcosmos community is a dynamic community providing a platform to all the foldscope users to upload photos and share information to the world.

The workshop will be valuable especially for the Research scholars who many a time face problems regarding microscopy and micro-photography. All the research scholars of the Department of Zoology are eligible to attend the one day workshop.

Sd.

Dr. Yahya Bakhtiyar

Teacher In-Charge, Research
